<b>Office Action Summary</b>	<b>Applicant No.</b>	<b>Applicant(s)</b>	
	09/839,254	HILLIARD, DONALD BENNETT	
	<b>Examiner</b> Gioacchino Inzirillo	<b>Art Unit</b> 952	

— The MAILING DATE of this communication appears on the cover sheet with the correspondence address —  
**Period for Reply**

**A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.**

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) Responsive to communication(s) filed on \_\_\_\_\_.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 1-21 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on \_\_\_\_\_ is/are  accepted or b) objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) The proposed drawing correction filed on \_\_\_\_\_ is/a) approved b) disapproved by the Examiner.  
If approved, corrected drawings are required in reply to this Office action.
- 12) The oath or declaration is objected to by the Examiner.

**Priority under 35 U.S.C. §§ 119 and 120**

- 13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
  - a) All b) Some \* c) None of:
    1. Certified copies of the priority documents have been received.
    2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
    3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.
- 14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
  - a) The translation of the foreign language provisional application has been received.
- 15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

**Attachment(s)**

- 1) Notice of References Cited (PTO-892)
- 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) Information Disclosure Statement(s) (PTO-1449) Paper No(s) \_\_\_\_\_.
- 4) Interview Summary (PTO-413) Paper No(s) \_\_\_\_\_.
- 5) Notice of Informal Patent Application (PTO-152)
- 6) Other: \_\_\_\_\_.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

(1) Claims 3 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 3 recites the limitation that additional layers are deposited. It cannot be understood from the context of the claim where they are deposited. This claim is indefinite. *no structure*

Claim 5 recites the limitation of a material with an optical absorption cut-off. It cannot be determined from the context of the claim where the material is located in relation to the cavity. *no structure*

This claim is indefinite.

*look @  
wording  
spec.*

### ***Claim Rejections - 35 USC § 103***

(2) The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3 – 5, 8 – 11, 13, 17, 18, 19 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baer US 4,829,537 (herein after known as Baer) in view of Emmett US 4,925,259 (herein after known as Emmett).

(3) Regarding claims 1, 4, 17, 18, 19 and 21 in Baer, column 2 line 67 through column 3 line 14, there is described how the laser cavity of the Baer invention is formed. Fig. 1 of Baer is the

Art Unit: 2828

corresponding figure to this to description, and shows pump radiation being coupled through the A surface of revolution. The spherical gain medium 12 has coating 14 applied to its entire surface.

This combination of gain medium and reflector forms the resonator cavity 18. Being a sphere, the cavity is inherently a surface of revolution. It is also inherent that the opposed sides of the spherical cavity define opposing optically reflecting surfaces. Column 5, lines 13 – 23, tells that the Baer invention can be made to operate in such a way as to allow preferred modes to be emitted. This preferred mode operation results in a single longitudinal mode, single frequency output. Baer fails to teach a multilayer dielectric reflector. However, Emmett teaches such a reflector in his patent. Fig. 2 of Emmett shows discloses the invention of an alternating layer structure built atop a substrate, where each layer has either one of two indices of refraction. The invention is generally described in column 1, line 67, through column 2, line 2, as a multilayer dielectric coating for optical elements, which is designed to have a high damage threshold. The invention is further described in column 2, lines 36 – 39, as a multilayer dielectric coating having from 100 to 100,000 or more layers. The at least 120 layers recited in claim 21 is encompassed by the range of Emmett. Column 5, lines 25 – 26, of Emmett describe an embodiment where the difference in the indices of refraction is only 0.015, which is smaller than 0.2. Baer gives some examples of the materials of which his coating could be made in column 5, lines 3 – 5. Amongst those listed is quartz. Emmett mentions the same material in column 4, line 40 of his patent. As one of ordinary skill in the art would know, fused silica is quartz. Therefore, for all intents and purposes, the isotropic coating 14 of Baer is, or could be, a multilayer dielectric coating. If it is not, however, a multilayer coating could still be used as the optical coating, since Baer tells us in column 2, line 68, that the coating is an isotropic coating, and places no further restrictions on

define isotropic (Same from different angles, yes, contradiction)

Art Unit: 2828

(F)

the coating. Since the multilayer dielectric coating of Emmett is isotropic, it can be substituted for the coating of Baer. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Baer with the multilayer dielectric coating as taught by Emmett.

is F?

(G)

(4) Regarding claims 3 and 5, column 2, lines 36 – 39, of Emmett describes 100 to 100,00 layers, which could be adapted for other purposes.

(5) Regarding claims, 8 – 11, these claims are intended use claims, and it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations, Ex Parte Masham, 2 USPQ F.2d 1647 (1987). *→ change to structural claims*

(6) Regarding claim 13, see column 4 lines 46 – 49 of Baer.

(7) Regarding claim 16, it is well known in the art, that with appropriate techniques a broadband spectrum emission can be narrowed, for any type of laser.

(8) Claims 6, 7, 14 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baer in view of Emmett as applied to claims 1, 3 – 5, 8 – 11, 13, 17, 18, 19 and 21 above, and further in view of Greene US 4,945,547 (herein after known as Greene). Baer in view of Emmett teaches the invention as outlined in the rejection above, but fails to teach a discontinuous surface and

Art Unit: 2828

reflector. However, Greene teaches both in his patent. Fig. 1 of Greene shows discontinuous surface defined by the placing of the gain media 12, all of which have a coating reflector 20. Furthermore, the central space in the cavity is free to hold another material, such as a structure or a reflector. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Baer in view of Emmett as taught by Greene.

?  
degrees of separation?

⑨ Claim 2, 12 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baer in view of Emmett as applied to claims 1, 3 – 5, 8 – 11, 13, 17, 18, 19 and 21 above, and further in view of Smith US 3,887,882 (herein after known as Smith). Baer in view of Emmett teaches the invention as outlined in the rejection above, but fails to teach discharge excitation of a gas laser medium. However, Smith teaches this in his patent, see Smith. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Baer in view of Emmett as taught by Smith.

*Prior Art*

⑩ The following US patent is being made of record, even though they were not relied upon in this Office Action, for being similar in subject matter, and may be relied upon in any future Office Actions: 4,651,034.

#### CERTIFICATE OF MAILING

I hereby certify that the items listed below are being deposited with the United States Postal Service utilizing the "**EXPRESS MAIL POST OFFICE TO ADDRESSEE**" service, mailing label number ER 507109289 US under 37 CFR 1.10 in an envelope addressed to: Assistant Commissioner for Patents, Box Reconstruction-CP-4-6-C35, Washington, D.C. 20231, on the 12 day of DECEMBER, 2003.

  
Donald B. Hilliard

Enclosed are Reconstruction papers, under 37 CFR 1.251, for U.S. Patent Appl. Ser. Nr. 09/839,254 filed 4-20-2003, comprising a transmittal sheet, this certificate of mailing, and copies of:

- A statement by Applicant that the attached copies of correspondence, listed below, is a complete and accurate copy of applicant's record all correspondence between Office and applicant that took place after filing of the non-provisional application.
- First Office Action (mailed 10-07-2003) in prosecution of the application
- Fax of proposed draft claims to S.P.E. Paul Ip.
- Response (filed 4-07-2003) to the first Office Action, consisting of:
  - Transmittal Form.
  - Fee transmittal form.
  - 26 sheets of the Response/Amendment.
  - cited references of Response/Amendment.
  - Petition for extension of time under 37 CFR 1.136(a).
  - check for \$ 492 - ← cashed by USPTO; but not available
  - marked and amended copies of specification.
  - Itemized return postcard (stamped and returned by Office)

Please type a plus sign (+) inside this box → **[+]**
